

Physiotherapy in Intensive Care Unit

Course Description :

Patients admitted in ICU are very critical and they require special care and a multidisciplinary team to get them moving soon. Physiotherapy treatment as part of a multi-disciplinary approach to care is integral in promoting lung function, reducing the incidence of ventilator-associated pneumonia, facilitating weaning and promoting safe and early discharge from the intensive care unit.

Topics covered in the Course:

- Role of Physiotherapist in ICU
- Various assistive devices used in ICU
- Mechanical ventilators in brief
- Various techniques used in ICU

Benefits of the Course:

- Participants will get an idea on how to manage a patient in ICU.

Outcomes of the Course:

- Participant will have confidence in treating patients in ICU

Eligible Stream of participants:

- Student perusing bachelor on Physiotherapy
- Students willing to work in ICU
